

ASSIGNMENT NO 2

SQL Queries: a. Design and Develop SQL DDL statements which demonstrate the use of SQL objects such as Table, View, Index, Sequence, Synonym, different constraints etc. b. Write at least 10 SQL queries on the suitable database application using SQL DML statements. c. Note: Instructor will design the queries which demonstrate the use of concepts like Insert, Select, Update, Delete with operators, functions, and set operator etc.

Create following table

Table Name : Customer

Table Column Name : Account_no, Name, Balance, City

Insert Following Record

1 Ram 10000 Pune

2 Ravi 25000 Nasik

3 Sachin 30000 Mumbai

Set Operation : Union, Intersect, Minus

Create following table

Table Name : Loan

Table Column Name : Loan_no, Name, Loan_Amount

Insert Following Record

1 Ram 10000

2 Ravi 50000

4 Dipak 40000

1) Select customer having account in the bank or taken the loan from the bank

2) Select customer having account as well as loan in the bank

3) Select customer having account in the bank but not taken the loan

gescoe@gescoe-OptiPlex-3010:~\$ mysql -h 192.168.2.232 -u TEB39 -p
